Profile

I am a full-stack developer with experience in .NET applications. I have participated in the development and corrective and evolutionary maintenance of different systems for different clients. My goals are to continue developing myself in the creation and maintenance of web applications, constantly incorporating and updating myself with new technologies.

Employment

Sep 2022 - Present

Full-Stack .NET Developer

Chevron, Buenos Aires, Argentina

Developed modules and bug fixes for an internal business application centralizing business information and processes. Built a context-aware AI automation that generates resource descriptions from relevant context.

Jun 2021 - Aug 2022

Full-Stack .Net Developer

Inchcape Shipping Services, Madrid, Spain

Development of new modules and bug fixes for an application dedicated to real-time ship tracking, port and terminal information.

Jun 2020 - May 2021

Full-Stack .NET Developer

Globant, Buenos Aires, Argentina

In this project, my tasks were to maintain and create different APIs that manage the subscriptions, newsletter and information of the users of the services offered by a mass media holding company, oriented to the newspaper publishing industry.

Dec 2018 - May 2020

Full-Stack .NET Developer

IT Providers, Buenos Aires, Argentina

I worked on-site in the client "Banco Galicia" (through Accenture consultancy), in her project "Office Banking", in the "Digital Payments" team that is in charge of banking products such as Payment of Services, Registration and cancellation of Cards, Stop-Debit, and Direct Payment.

Aug 2017 - Nov 2018

Full-Stack .NET Developer

Epidata Consulting, Buenos Aires, Argentina

- Development of a web application for the management of employees of a multinational steel company.
- Migration of a web application for the management of contractors of a multinational steel company.
- Development of a web application for the quality management of a laboratory.
